PROJECTS

Blood-Bank Management System — Database based Application (<https://github.com/Revanthpn/BloodBank>)

- Designed using C# and .Net framework in front-end and Sqlite database in the back-end.
- Developed to help its donors, blood bank branches and its hospitals to automate the blood supply.
- Blood recipients can find donors or blood banks near them and contact them.

Airplane — Computer Graphics based Application (<https://github.com/Revanthpn/CG-mini-project>)

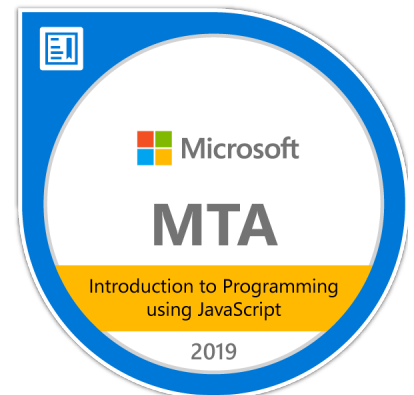

- Implemented using C, OpenGL and SOIL2 libraries have been used to load images.
- The goal of this game is to fly as far as possible, with only two controls at your disposal, You'll first select a plane and a scene. Click once to start making your Airplane take off .
